

# CARPENTRY/BUILDING CONSTRUCTION (CARP) | FACULTY OF TRADES & TECHNOLOGY

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables/](http://www.kpu.ca/registration/timetables/) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca/) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

## CARP 1102 2 credits

### Safe Work Practices

Students will learn the skills and work habits required for success in the carpentry trade. They will identify the relevant sections of the WorkSafeBC OH&S Regulation and will recognize the potential hazards affecting personal safety and access on the construction site.

Level: VO

Attribute: TRAD (<https://calendar.kpu.ca/courses-az/#courseattributestext>)

## CARP 1104 3 credits

### Hand and Power Tools

Students will learn to measure, lay out and safely cut and assemble wood into various building components, jigs and projects using hand tools and portable and shop power tools commonly used in the carpentry trade.

Level: VO

Prerequisite(s): CARP 1102

Attribute: TRAD (<https://calendar.kpu.ca/courses-az/#courseattributestext>)

## CARP 1109 3 credits

### Building Materials, Codes and Drawings

Students will learn and examine basic drafting skills to allow them to read residential blueprints. They will identify the basic elements of wood, and will identify how wood has been engineered for use in modern design through new technology. Students will identify the role of building codes and bylaws to determine proper building practices. They will describe the construction planning process along with trade mathematics.

Level: VO

Attribute: TRAD (<https://calendar.kpu.ca/courses-az/#courseattributestext>)

## CARP 1115 2 credits

### Building Site Layout & Leveling

Students will apply Pythagoras' theorem to layout procedures for residential foundations. They will learn basic leveling techniques using the automatic levels to current industry standards. Students will also learn to measure, set and record the results in a surveyor's field book. They will lay out a building and prepare batter boards and set building lines for a residential foundation.

Level: VO

Prerequisite(s): CARP 1109

Attribute: TRAD (<https://calendar.kpu.ca/courses-az/#courseattributestext>)

## CARP 1119 2.5 credits

### Building Residential Concrete Formwork Systems

Students will learn about concrete forming systems used in residential construction and light commercial applications. They will identify foundation requirements, set templates, and form block-outs according to the Building Code and standard construction practices. Students will use concrete fasteners to attach formwork materials to the concrete.

Level: VO

Prerequisite(s): CARP 1115

Attribute: TRAD (<https://calendar.kpu.ca/courses-az/#courseattributestext>)

## CARP 1125 3.5 credits

### Floors and Walls: Residential Framing Systems

Students will build components of Western Platform Framing applying the British Columbia Building Code to the structures. They will frame floors and walls. Students will follow the WorkSafeBC OH&S Regulation for all activities.

Level: VO

Prerequisite(s): CARP 1119

Attribute: TRAD (<https://calendar.kpu.ca/courses-az/#courseattributestext>)

## CARP 1130 3.5 credits

### Stairs and Decks: Residential Framing Systems

Students will build decks and stair assemblies used in residential home building according to the British Columbia Building Code. They will frame stairs and decks using standard framing practices in the industry according to the British Columbia Building Code. Students will follow the WorkSafeBC OH&S Regulation for all activities.

Level: VO

Prerequisite(s): CARP 1125

Attribute: TRAD (<https://calendar.kpu.ca/courses-az/#courseattributestext>)
